

Salience — High salience — Low salience

■ High ● Low ■ Overall

— High salience — Low salience ◆ No salience manipulation

* Study 3 used fixed change magnitudes ($\pm .20$ to $\pm .65$); partial r is inflated relative to staircase studies.
Shaded regions: 95% CI. Studies 4–5: High (orange) and Low (blue) salience.
Panel F: partial r of Change² on accuracy; Studies 4–5 split by salience.
